

Intense Blacks, Rich Colors, and Stunning Contrasts

Where Darkness Shines: Dive into Deepest Black with the New OLED TVs from THOMSON

Just in time for the holiday season, THOMSON proudly introduces its latest OLED Google TV lineup, available in 55", 65", and 77" sizes. Whether you're preparing for movie marathons or adrenaline-pumping gaming sessions, these TVs are designed to impress. Experience the unmatched clarity of OLED technology, with true blacks, vibrant colors, and breathtaking contrasts that bring every scene to life.

Cinema in Your Living Room: 120Hz, Dolby Vision IQ & Dolby Atmos

Say goodbye to average TV nights. The 120 Hz refresh rate ensures ultra-smooth motion. Whether you're watching the latest blockbuster or playing fast-paced games, the display eliminates motion blur, offering crystal-clear visuals. The TV is equipped with Dolby Vision IQ, which intelligently adjusts the brightness and contrast based on your room's ambient lighting, delivering the perfect picture every time of day. Dolby Atmos technology, paired with powerful built-in subwoofer, creates rich, room-filling sound with deep bass with a combined power of 54W that lets you feel every beat and hear every whisper. It's like having a movie theater in your living room.

Hands-Free Voice Control with Far-Field Technology

And here's the coolest part: with built-in Far-Field technology, you can navigate your TV with just your voice. Simply say "Hey Google" and find content, change channels, or even control your smart home devices, no remote needed. Alternatively, the ergonomic remote

control with the Google Assistant button allows for intuitive navigation, and its backlit design ensures you can easily operate it even in low-light environments.

Google TV OS: A Universe of Content

The THOMSON OLED Google TV comes with the latest Google TV operating system, giving you access to all your favorite streaming services, apps, and personalized recommendations in one user-friendly interface. With Google Cast, you can also stream content straight from your smartphone, tablet, or laptop directly to your TV with ease.
