

Old TVs can learn new tricks: The new Nokia Streaming Stick 800 turns your old TV into a Smart TV

Plug in and start streaming: Simply connect the new Nokia Streaming Stick 800 to your TV and be immersed in a world of entertainment. More than 400,000 films and series are available on Netflix, YouTube, Prime Video and Disney+ via Android TV. The backlit remote control allows for quick access to the popular streaming services with direct selection buttons.

Vienna, 18. October 2022 – Bored when channel surfing? Always the same programmes and instead of joy, boredom sets in? It's time to make your TV smart with the new Nokia Streaming Stick 800 from StreamView GmbH, licensee of the Nokia brand for Smart TVs and set-top boxes in Europe. Even older TVs can become Smart TVs with the Full HD Streaming Stick which opens a world of entertainment with an unlimited selection of films and series. If that's not enough, more than 7,000 Google Play apps are available with just one click. Download games via Google Play or turn your living room into a concert hall with YouTube. All this is just a click away, because the remote control has direct selection buttons for Netflix, YouTube, Prime Video and Disney+. Users of a Nokia Streaming Box also benefit from the new simplified remote control, as it is also available as a separate accessory. Compared to the remote control supplied with the Streaming Box, the new remote has improved functions and allows simplified access to the entertainment offer through the direct selection buttons.

Simple and quick installation

Streaming fans don't have to wait long for the viewing pleasure to begin. The Nokia Streaming Stick 800 is quickly set up and compatible with any TV set that has an HDMI connection. With the Android TV, users have access to streaming services as well as apps from the Google Play Store. Share what you're viewing on your smartphone, tablet or laptop on the big TV screen with ease via integrated Google Chromecast. For an all-round cinema experience, simply connect speakers via Bluetooth.

Everything in your hand

With only a few buttons, clearly arranged and focussed on the essentials, a comfortable grip, the remote control provides even faster access to favorite streaming services. The four practical direct selection buttons for each of the most popular streaming services mean you are just one button click away from YouTube, Disney+, Netflix and Prime Video. The integrated Google Play button also opens access to more than 7,000 apps. Search for shows, get recommendations, even control your TV – faster – with your voice. Press the Google Assistant button and ask Google for a little help on your big screen. If the lights are already dimmed for the TV evening, the backlit buttons provide the necessary help for easy viewing.

Upgrade for Streaming Box users: The simplified remote control is now also available as an additional accessory for the Nokia Streaming Box 8000. The newly designed additional device is now even smaller and therefore handier than the remote control already supplied. It connects to the Nokia Streaming Box 8000 in seconds. Simply pair via the settings menu of the Streaming Box, press and hold the "Home Screen" and "Back" buttons for 5 seconds and you will have access to your favorite streaming services, apps for YouTube, Apple TV, exciting Android games and much more in the palm of your hand.
