

THOMSON

Best entertainment on the go with the 12 V Google TV series from THOMSON

The road trip is planned, the motorhome is packed, but one thing better not be missing: the camping TV. With the two models THOMSON Google TV 24" HD 12 V and THOMSON Google TV 32" FHD 12 V, campers don't have to miss out on their favourite films or exciting games while on the road.

Whether in Scandinavia, overseas or in Germany, for many Adventurers, travelling by motorhome is the best way to explore a region at their own pace. But even in the most beautiful holiday region, many campers don't want to miss out on news and sports broadcasts and want to keep up to date with their favourite series. This is where the THOMSON Google TVs come into their own as compact devices for any area of low voltage like motorhomes, caravans, boats or mobile homes, offering first-class TV reception and streaming wherever you are.

The THOMSON Google TV 24" HD is equipped with a 12-volt car adapter, which is perfect for travelling. The model is available in the colours black and white. Thanks to a screen diagonal of 60 centimetres and a viewing angle of 178 degrees, the action can be watched comfortably from every corner of the mobile home. The screen resolution is 1366 x 768 pixels (HD). For holidaymakers who want a larger picture and a higher resolution, the THOMSON Google TV 32" FHD with a diagonal of 81 centimetres and 1920 x 1080 pixels is ideal. Both models have a frameless design that makes the viewing area appear larger. Dolby Audio technology ensures dynamic sound.

Google TV for full access to top streaming services

An integrated triple tuner makes it possible to receive the TV programme at your holiday destination via satellite or terrestrial antenna. If you want to use the camping model in your garden later on, you can also receive the programme via cable. The TV is also equipped with the Google TV operating system and offers access to over 400,000 films and programmes from various streaming providers, including Netflix, Prime Video and Disney+. Thanks to the integrated Chromecast built-in function, content from compatible smart devices can be streamed directly to the TV. The THOMSON Google TV 12 V also offers connections for external devices such as a games console (HDMI) or external hard drive (USB 2.0).

The buttons on the ergonomic remote control are backlit, making them easy to see even in poor lighting conditions. But the camping TV can be controlled by more than just buttons. The integrated Google Assistant allows control by voice command. Ask Google for the weather, new film recommendations or control compatible devices with your voice.

The features of the THOMSON Google TV 24" HD 12 V and 32" FHD 12 V at a glance:

- 12-volt power supply unit for reception on the move.
- Adjustable feet can also be placed on small pieces of furniture.
- Wall-mounting is possible.

Commented [AJ1]: "bild-in" was written in the DE version however this is incorrect as a phrase in English > "built-in" is correct
Either: "Thanks to the integrated Chromecast function,"
OR "Thanks to the built-in Chromecast function,"

THOMSON
