

The new Nokia Terrestrial Receiver 6000 easily upgrades TV sets to the most current terrestrial HDTV technology

The new Nokia Terrestrial Receiver 6000 is the new member of the StreamView portfolio and converts existing TV sets to the most up to date HDTV technology. In case of a DVB-T switch-off the receiver provides access to free-to-air channels via a terrestrial antenna with low investment.

Vienna, February 23, 2021 – StreamView GmbH, the Nokia brand licensee for Smart TVs and Set-Top-Boxes, introduces the new Nokia Terrestrial Receiver 6000, which is available in Europe as of today.

The new Nokia DVB receiver gives immediate access to all in your country available free-to-air channels and brings live-TV to your screen in High Definition or Standard Definition. In case of an upcoming DVB-T switch-off, the Nokia receiver offers a great alternative to buying a new TV. The installation is very simple and easy thanks to the built-in wizard guide. With the Nokia receiver you also can create personalized lists and sort channels in favourite lists by genre, family member or other preferences. Zap quickly between your favourite shows, films, documentaries, sports and enjoy full access to details on the present and following programmes. The new Nokia DVB-T2 receiver combines the familiar style quality and the Nordic minimalist design of Nokia products with state-of-the-art technology.

Extensive equipment and pure design

The Nokia Terrestrial Receiver 6000 has a standard DVB-T/T2 reception and contains a timer and teletext function. It supports the new H.265 standard as well as Dolby® Digital Plus and offers among other things a resolution of 1080i and 720p. Thanks to the integrated USB 2.0 port videos, photos, sports and movies from an external device¹ can be enjoyed on the TV. Additional connectivity is provided by a HDMI, AV Out and a coaxial connection.

The elegant and ergonomic remote control features a compact and minimalistic design that is smooth to the touch. Push the button on the remote control to open the on-screen TV-Guide and access details on the present and following programmes or set a timer.

The new Nokia receiver is easy to set up and compatible with any TV that has an HDMI or an analogue Audio Video connector (Scart or Cinch)². The receiver comes in an elegant shade of black and features the familiar minimalistic Nordic design which the Nokia brand is well known for.

¹ External USB devices

² AV to Scart cable is included in the package

Price and availability

The Nokia Terrestrial Receiver 6000 is available Europe-wide online from today at nokia.streamview.com for a recommended retail price of 49.90 EURO (incl. VAT). The product will also be available from March 16th at online stores like Amazon and through selected retailers in the European Union. Check nokia.streamview.com for updates.
